“Rock the Block” – a positive note to community

This event was inspired as an initiative to come together in the spirit of community.

All parties were invited to contribute their talents, resources and knowhow in this spirit.

It is a big undertaking to put on an event free to the community of this scale, in light of differing views.

The contributions from financial sponsors have been invested in infrastructure including; staging, sound engineers, marquees, kid’s rides and activities, food, bins, first aiders, security and porta-loos, to name but a few costs. We have also received wonderful support from a large number of in-kind sponsors, mostly made up from local organisations who were very willing to contribute their time and resources.

We greatly appreciate the artists that have chosen to come on board with the same spirit in which the event was created. The artists were happy to contribute their art knowing that it was a “love gig” for the community, operating with a tight budget. At the end of the day we contributed a small amount, mostly travel and accommodation costs to support out of town acts that we believed the community would embrace.

“Rock the Block” was and is foremost, a day of harmony and fun for our children, our future generation.
